Web Developer

Results-driven Web Developer with extensive experience in WordPress and Shopify. Expert in utilizing Elementor, Gem Builder, and Liquid to transform client requirements into high-performance, responsive websites. Currently expanding technical expertise in React.js to build modern, scalable web applications

Technical Skills:

- **CMS & Builders:** WordPress (Elementor Pro, Divi), Shopify (Liquid, Gem Builder, Theme Editor)
- **Languages:** HTML5, CSS3, JavaScript (ES6+)
- **Libraries/Frameworks:** Tailwind CSS & React.js (In-Progress).
- **Design & Tools:** Responsive Design, Performance Optimization, Cross-Browser Compatibility, Troubleshooting.

Work Experience:

Web Developer | VALs Code, Karachi | 2025 – Present

- Design and deploy custom **WordPress** and **Shopify** solutions, utilizing **Liquid** and **Gem Builder** to deliver pixel-perfect, mobile-responsive layouts.
- Optimize site architecture for enhanced performance and accessibility, ensuring seamless user engagement across all browsers.
- Collaborate with senior developers in an Agile environment to meet rigorous project milestones and deadlines.

Key Projects:

- Chic Lighting – Developed a high-end indoor decoration based responsive front-end interface using HTML, CSS, and JavaScript.
Live Demo: chiclightingproject1.vercel.app
- Care Groups – Engineered a healthcare-focused CRUD application leveraging PHP and MySQL.
GitHub Repo: github.com/delepovert56/care-group
- Furthermore, projects are available in my portfolio.
